Ernitec EVR GO

App for iPad, iPhone, iPod, and Android

Ernitec EVR GO app *brings true mobility to video surveillance. It allows remote access to video surveillance footage via various mobile devices – such as phones, PDAs and hand-held tablets. Authorized personnel can use the Ernitec EVR GO app when roaming, whether that be on-site, or from elsewhere.*

This supports situational awareness for first responders; provides security professionals with a more adaptable method

for mobile monitoring; and much more.

Features

> **Ease of use –** Free download from App stores provides an intuitive interface for viewing live camera or playback recordings

> **Powerful –** Clear image quality with flick to zoom facility. Control PTZ cameras and switches, and resolve alarms.

> **Fast –** Single tap to send snapshot via email

> **Flexible –** Ability to access across multiple sites

How to get started

You can download the Ernitec EVR-GO app easily to your iPhone, iPad or iPod touch from the Apple App Store. For Android based devices, visit the Android Play Store.

Once downloaded, the application contains local demo video and a connection to Ernitec EVR server.
