# 1CH Video Server With Audio Ver. 061031

**Quick Installation Guide** 

# **1.1 PACKAGE CONTENTS**

Video Server

Power Adaptor (Option)

**Terminal Blocks & Screws** 

# **1.2 PHYSICAL DESCRIPTION**

## 1. <u>Video Input / Output</u>

The video server supports one analog video input and output of composite signal with BNC connectors

### 2. <u>Audio Input / Output</u>

The video server supports one audio input and output with earphone jack

### 3. Dip Switch for Serial Port

RS-485 or RS-422 pin define (default is RS-485)

### 4. Action LED Indicator

The LED will light up after video server has successfully completed the boot process.

# 5. <u>Serial Port LED Indicator</u>

LEDs indicating when serial port is active.

### 6. <u>Reset Button</u>

Step 1: Switch off video server by disconnecting the power cable

**Step 2:** Using a suitable pointed object, press and continue to hold the Reset Button depressed. While continuing to hold the reset button depressed, reconnect the power cable.

**Step 3:** Keep holding the reset button depressed around 6 seconds, release the reset button. The unit will start up with factory default settings.

# 7. <u>Terminal Blocks Pin 1~6</u>

The video server supports two alarm input and two alarm output.

DI: Logic Level 0: 0~0.4V; Logic Level 1: 3.3~30V

DO: Logic Level 0: 0.1~0.6V; Logic Level1: 2.4~5V

DO1 DO2 GND DI1 DI2 GND

PIN	NAME DESCRIPTION	
1	DO1	Digital Output 1
2	DO2	Digital Output 2
3	GND	Ground Pin
4	DI1	Digital Input 1
5	DI2	Digital Input 2
6	GND	Ground Pin

# 8. <u>Terminal Blocks Pin 7~12</u>

Pin 7~10: RS232/422/485. Default mode is RS-485

Pin 11~12: DC 12V power input

Tx+ Tx- Rx+ Rx- 12V GND

PIN	NAME	DESCRIPTION			
		RS-485	RS-422	RS-232	
7	Tx+	D+	Tx+	Тx	
8	Tx-	D-	Tx-		
9	Rx+		Rx+	Rx	
10	Rx-		Rx-		
11	12V	Power Inp	out (DC +1	2V)	

12		Ground Pin of Power Input &
12	GND	RS-232

## 9. LAN Port

The Video server connects to the LAN (local area network) via a standard RJ45 connector. Supporting NWAY, this Video server can auto detect the speed of local network segment (10Base-T/100Base-TX Ethernet).

## 10. WAN Port

The Video server connects to the WAN (wide area network) via a standard RJ45 connector. Supporting NWAY, this Video server can auto detect the speed of local network segment (10Base-T/100Base-TX Ethernet). The WAN port is for FTTH and can connect to a xDSL or cable modem.

# **1.3 CONNECT NECESSARY CABLES**

The BNC cable for video input, Ethernet cable and power cable are necessary for previewing function. Make sure all cables are correctly and firmly connected.

- **1.** Connect an analog monitor to video server video out (BNC connector).
- 2. Connect the power adaptor to video server
- 3. Connect the video server's LAN port to an Ethernet (RJ45 connectors)
- 4. Connect a PC to the Ethernet hub (RJ45 connectors)

This section guides you with a quick tour on Video Server.

# 2.1 Configure Video Server

### 2.1.1 Make sure network environment

Default IP of Video Server is 192.168.0.100. Please make sure Video Server and your PC are on the same network segment before running the installation.
