BASIC+ NVR1021R

ernitec

With a height of only 9 cm and a depth of 50 cm and with up to 4 hard discs the Enterprise NVR 1021R is quite small in a 19" rack and is indeed a sensation when it comes to IP video surveillance.

After just a short installation the system is ready for use and the software, which is delivered in multiple languages (Danish, English, French, Arabic and many more), will insure an easy operation of the system.

Like the other NVR models in Ernitec´s product portfolio the Enterprise-NVR1021R is built around the latest Green Power technology with minimal power consumption and optimal performance.

The specially designed machine is equipped with two gigabit network interface cards which give a unique possibility to separate the video network and the company network, in order not to interfere with each other.

Furthermore the NVR software is installed on a separate hard disc and the video recordings are stored on a special chosen 24/7 Green Power hard disc that insures a high stability for the system. It is possible to upgrade both models with two extra 1TB 24/7 Green Power hard discs.

The simple construction makes the system easy to operate and ca be done with the enclosed mouse, regardless if you are logged on, see live pictures or search for recordings.

Like all the other Ernitec products the Enterprise+ NVR1021R is fully supported in Ernitec´s CMS software EasyView™ (please look at the EasyView™ datasheet for more information).

- Up to 21 megapixel or 16 VGA cameras (can be upgraded to 42 megapixel or 32 VGA)
- D: 49.3 cm x W: 42.2 cm x H: 8.8 cm
- Separate hard discs for the NVR software and the recordings
- Up to 4TB 24/7 Green power hard disc
- 2 x Gigabit network interface card
- JPEG, MPEG4 and H264
- 2 x monitor output (VGA/ DVI or VGA/DP)

BASIC+ NVR1021R

Specifications

BASIC+	NVR1021R
Software function	
Maximum megapixel	42
Camera streams	max. 32
Window layout	1,4,6,8,9,10,16,25,36
2-way audio	yes
Digital zoom	live and recording
User def ned schedule recording	yes
Alarm and motion recording	yes
Pre-event recording	max. 30 sec.
Port-event recording	yes
Watermark on recording	date and time into video stream
Snapshot	live and recording
Synchronized playback	4 channels
Event and time playback search	yes
PTZ-control	yes
Hot-spot and pup-up window	yes
E-mail and FTP notif cation	yes
Video and network loss disconnection	yes
Remote software	web client and PC client software
Export video	RAW and AVI
Multi user level permission	yes
Hardware specifications	
Operating temperature	+5 to +35 C
Storage hard disc	1TB
Max storage hard disc	4TB
Monitor output	2 (VGA/DVI or VGA/DP)
Gigabit network interface card	2
Dimensions (DxWxH)	49.3x44.2x8.8 cm
Order information	0075-00506
