

CCTV System Control Keyboard

ernitec

The 3-Axis CCTV system control keyboard from Ernitec can easily control the Ernitec ERIS3000 DVR and the Ernitec Speed Dome range via RS-485 interface for remote control and system configuration.

The keyboard is specially useful in large CCTV systems, where up to 255 devices can be controlled on the same bus through the keyboard, including 223 cameras or receivers, 16 system control keyboards, and 16 DVRs.

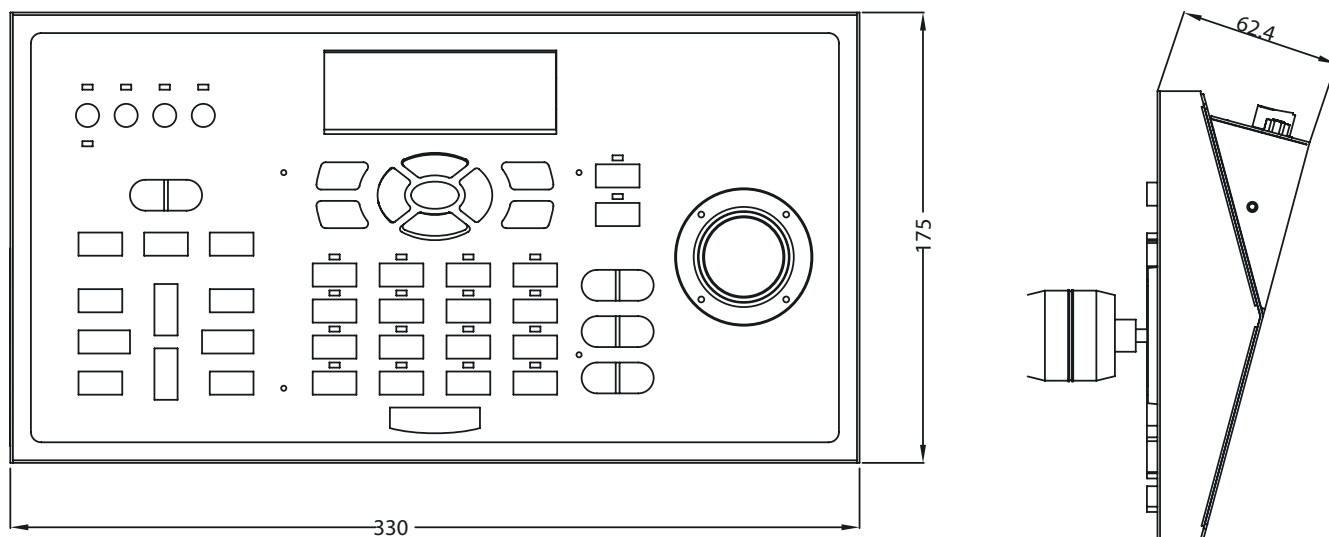

The keyboard supports Pelco D and Pelco P protocols, allowing users to integrate Ernitec products into existing systems of other brands and to extend the system compatibility and connectivity.

Key features:

- Remote control via RS-485 interface
- 3-axis joystick control of PTZ
- Can control up to 255 devices
- Firmware upgrade via RS-232 port
- Built-in clock for date and time recording
- Supports Pelco D, Pelco P, and DSCP protocols
- Password protection and key-lock function
