

New Software Version 7730-2888-0394-0568 for the ERIS Serie

Local:

1. Correct the support for DVD+R DL multi-session (though multi-session is not recommended for DVD+R DL media).
2. Modify the time representation (fix it to Year/Month/Day in readme.txt).
3. Increase the stability of the front USB port.

Remote:

1. Change time format representation of exported readme.txt file.(Will be Year/Month/Day).
2. Add “smooth” function in full-screen mode in the configuration.
3. Support Monitor resolution up to 1440.
4. Farsi version remote software interface will be set in English.

Fix:

1. Correct Channel can not be seen in full-screen mode for event-playback.
2. Event download function cannot work correctly.
3. Configuration is not correctly shown.
4. Fails to go back to 16x9 mode from 4x3 mode.
5. Fails to correctly show the video frame of the next camera when double clicking the current video frame.
6. ezRecord option cannot show up normally in remote-configuration setting.
