The Build-ESR1800 is a powerful video surveillance recorder that is optimized to work with CCTV VMS Software for sensitive & long-term viewing and storage of IP/Megapixel cameras.

The Build-ESR1800 is engineered to maximize the way the processor, memory, graphics, OS and software technology work together to deliver massive recording power.

Bringing new standards to the market with a specially developed configuration GUI for language selection and network settings that simplifies the installation. On top of this the unit is loaded with our unique ESR software developed by Ernitec to backup the complete machine including OS and VMS settings.

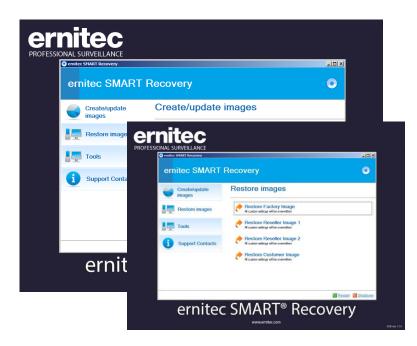

All systems have been hardware tested over 24 hours and include more than 60 unique systems settings before leaving the assembling line to make sure that the system will run perfect 24 hours per day year after year.

The special Health hardware management software and the ESR INFO notification server give you early warnings if a problem is detected.
